

M. Abdullah

Flutter Developer

PROFESSIONAL SUMMARY

Flutter Developer with 2+ years of experience delivering production-grade cross-platform mobile apps for Android and iOS. Shipped 6 production apps across ride-booking, property rental, VPN, AI fitness, and social domains. Expert in Firebase, REST APIs, Google Maps, Stripe, MVVM, and Clean Architecture. Focused on performance, scalability, and polished UI.

PROFESSIONAL EXPERIENCE

Flutter Developer

Sep 2025 – Jun 2026

KM Innovations

- Developed scalable Flutter apps for Android & iOS from concept to store deployment.
- Designed responsive UIs following Material Design and modern UI/UX principles.
- Integrated REST APIs, Firebase suite, Google Maps SDK, and Stripe Payment Gateway.
- Implemented MVVM architecture with Provider / Riverpod state management.
- Collaborated with designers, backend engineers, and QA teams in Agile sprints.
- Published and maintained live apps on Google Play Store and Apple App Store.

Flutter & Android Developer — Intern

Feb 2024 – May 2025

AU Software House

- Built Expense Tracker with categorization, analytics, and local SQLite storage.
- Developed Islamic Self-Improvement app with habit tracking and progress analytics.
- Gained core Flutter architecture and Android development workflow experience.

FEATURED PROJECTS

Ride Booking & Home Services Platform

Stack: Flutter · Firebase · Google Maps · REST API · Provider · MVVM

- Production Careem-like app with separate user and driver applications.
- Google Maps route visualization, live driver tracking, and turn-by-turn navigation.
- OTP Firebase auth, real-time chat, FCM push notifications, and ratings system.
- Driver app: ride accept/reject, toggle availability, earnings & trip history.

LetServe – Property & Apartment Booking

Stack: Flutter · Firebase · REST API · Google Maps · Stripe

- Full booking platform for apartments, flats, hotels, and studio rentals.
- Advanced search / filter with Google Maps property location display.
- Stripe Payment Gateway for secure payments with complete booking history.

Premium VPN Application

Stack: Flutter · Firebase · WireGuard Protocol

- WireGuard-protocol VPN app with Google & Apple Sign-In.
- Premium subscription management and intelligent server selection.

Baller Pro – AI Football Fitness App

Stack: Flutter · Firebase · REST API · AI Integration

- AI-powered platform with personalized diet plans and match progress tracking.
- Challenge Mode, player community, post sharing, and performance analytics.

ADDITIONAL PROJECTS

SeaYou – Dating App

Maintained live production app — bug fixes, new features, and store updates.
